The war chancellories of the allies and of the Germans have not seen fit to lift the curtain of secrecy high enough for the public to obtain an insight into the conditions which prevail along the battle line in France. "There is nothing to report," says the French war office, "except that there has been a lively engagement in the region of Roye, where in the last two days we have captured 1,500 prisoners," that is all.

From the British and the Germans came nothing.

Of the situation in the east the Austrian general staff in a despatch coming by way of Berlin, reported a complete breakup of the Russian invasion in Hungary, and said that the Russian emperor's forces had been cleared from a portion of the Carpathians.

The Russians in their turn declared that near the East Prussian frontier in Russian Poland they were still pressing the Germans hard and at several points had obtained successes over them.

Rumors of Fall of Antwerp.

While the morning newspapers in London have been informed "on good authority." that Antwerp has fallen, neither the British official press bureau nor the Belgian minister are able to confirm the report. The last advices from Belgian had the Germans still hammering away with their artillery against Antwerp. One despatch said 306 big German guns were in operation there. Ostend advices reported thousands of refugees arriving in that city.

A Berlin despatch says that King Albert of Belgium, who has been reported to have left Antwerp at the head of a portion of his troops has been elight.

FOURTH ALARM FIRE

AT COLUMBIA UNIVERSIT Fire in Boiler House Threatened Nearby Dormitory.

New York, Oct. 10.—Fire which proke out in a two-story building on Columbia university campus shortly after midnight this morning threat-ened to spread to nearby dormitories, causing the sounding of the fourth alarm at 1.30 o'clock. The burning building, used as a boiler house and gymnasium, was within 25 feet of one

of the dormitories.

Fifteen minutes later there was little hope that the gymnasium, with its lockers and athletic clothes; the editorial rooms of the Columbia Spectator; the college registration office; the swimming pool; the rooms occupied by the national commission—of prison labor—all in the burning building—all could be saved. It appeared, however, that the flames would not spread and that none of the dormitories would be destroyed. destroyed.

destroyed.

A number of students who had left a smoker, ran into the building and saved some of the Columbia athletic torphies, notably the one captured by the college crew in the intercollegiate regatta at Poughkeepsie last June.

Across the street in Whittier hall, many girl students of Barnerd and women teachers in the Barnard Teachers' college were asleep in dormitories. They were aroused but the building they were in did not appear to be in danger of burning.

It was thought that the fire started in the boiler room in the basement.

At 2 o'clock this morning it was believed that the fire was under control.

For example, during the last day or two we have had one gentleman who had been helped along by the American authorities from as far as Mozambique, another from Astrakan and a third from Calcutta. It is probable that this small stream of American travelers will be flowing into London from out of the way places for some months. "Another situation, however, has presented itself to the committee which will require its activities throughout the war. Details Not Received.

Details of the proposal were not received here, so far as is known, but officials found somewhat of a parallel for the plan in the organization and powers of the Philippine commission. They thought it probable such a commission would at first be of a military nature largely, since its authority must be supported by the army, although it might later, through changes in the personnel, become entirely civil and provide an easy way for return to constitutional government. Further reprovide an easy way for return to con-stitutional government. Further re-ports of distress on the west coast of Mexico came tonight from Admiral Howard. Lack of food or of any cen-tral authority, he said, caused contin-ual conflict between the people and the soldiers. The food shortage there, has been called to the attention of the American Red Cross, and steps to re-lieve it probably will result.

TO NEUTRAL NATION Not to Be Permitted to Get Into the Hands of Belligerent Nations,

Washington, Oct. 9.—Senator Walkin of Montana suggested to the presi-dent today that Great Britain be redent teday that Great Britain be requested to solicit guarantees from neutral nations that they would not permit consignments of American copper to get into the hands of beiligerent nations. The state department is now seeking such guarantees from Holland, Norway, Sweden and Italy, but the senator believes English should do this.

"There is no reason why friendly nations should not continue trading in copper," the senator said. "Yet Eng land has undertaken to interfere with all shipments of American copper to neutral nations. There is no extra-ordinary shipment of American cop-per and none of it is going to belli-gerents through neutral nations. The gerents through neutral hallons. The United States usually ships to Holland about 225,000,000 pounds of copper annually. From January 1 to June 1 of this year we shipped to Holland 99,000,000 pounds of copper and shipments to Holland since that time have been considerably less in each month."

NEWSPAPERS TO PROTEST WAR REVENUE PROVISION Calling for Stamp on Bills of Lading on All Packages.

Washington, Oct. 3.—Newspaper publishers generally are preparing to ask the senate to change portions of the house war revenue bill providing for a stamp on the bills of lading on the house war revenue hill providing for a stamp on the bills of lading on all packages, so that it will not be necessary to attach bills of lading to bundles of newspapers. The newspaper owners do not object to paying the tax, but regard the method of levying it as impracticable. They centend that neither the railroads nor other transportation companies will hold their cars until newspaper packages are checked, stamped and receipted for.

Pittsburgh newspaper publishers who have inquired into the effect of that section of the bill as passed by the house requiring bills of lading, manifests and receipts with stamps attached in connection with the shipment of newspapers believe that very serious delays in delivery will result.

Instead of this system of stamped bills of lading, the newspaper publishers of Pittsburgh, for example, suggest that a tax could be imposed on the basis of sworn circulation.
